Profile

Self driven critical thinker with a diverse problem-solving background in poker, web & app development and design. Highly adaptable and capable of learning new roles and skills. In my independent learning and development path I have always been driven by my need to attain my absolute best. I am seeking to apply my individual creativity to the stock market.

Education

Degree

2015 - 2018 **BSc Creative Media Technology**
Leeds Beckett University
2 : 1

Web & App development

Coding enabled me to develop a logical problem solving methodology. I taught myself app development as it was not part of the course and I was keen to learn.

Design

Creative and innovative visual problem solving.

2014 - 2015 **BArch Architecture**
Leeds Beckett University
Pass

Early on during the first year of Architecture I decided it was not for me, however it was important to me to make the most of the year and still complete the coursework.

2011 - 2013 **A Levels**

Economics (C)

Design and Technology: Product Design (C)

Ancient History (B)

Extended Project Qualification (B)

Architecture work experience at PPIY Architects in York

2009 - 2011 **GCSEs**

English Language (A)

Religious Studies (A*)

English Literature (A)

Chemistry (A*)

General Studies (A)

Biology (A)

IT (A)

Physics (A)

Maths (B)

History (A)

Statistics (B)

French (B)

Experience

2019 **Trading**
Intermediate knowledge of technical analysis, with a basic fundamental analysis understanding.

Currently refining my custom trading strategy through use of paper trading, planning and reviewing trades and studying. Completed Udemy and Youtube online courses with over 100 hours of experience after just a short time of learning. Member of several online groups and forums with regular interaction.

- 2017 - 2019 **Poker**
Starting as a hobby, poker quickly developed into a source of income while studying at university. The decision was made to play professionally after graduating to earn money for another trip to Asia. I invested some of my winnings into an online course (Upswing Poker) and studied extensively in order to improve my expertise. Poker developed a wide range of skills that can be applied to the stock market.
- Multi-tasking** making quick time, high pressure decisions while playing up to 12 tables at one time.
- Objective logical reasoning** when encountering bad beats and long down-swings.
- Data management & analysis** while using a HUD and tracking stats on other players. Interpreting this data to take advantage of weaknesses in their games.
- Autodidactic learning**, constantly striving to be better by reviewing hands, studying and analysing plays.
- Self discipline & motivation** remaining within bankroll management and forcing myself to continue during down-swings.
- 2014 & 2019 **Traveling**
I have been back-packing around South East Asia twice, falling in love with the people, culture and way of life. During my first trip I volunteered at a construction site, helping build a children's orphanage which was a hugely gratifying experience. Traveling has broadened my perspective on life and the wider world.
- 2011 **Sports Leader & qualified youth referee**
Leadership course involving teaching, motivating and refereeing children. I completed 10 hours of volunteering to complete the certification.
- 2009 - 2017 **Eden Camp, Maintenance Department**
Part-time 7 years
Full-time 1 year

Skills

Critical Thinking
Problem solving
Creativity & innovation
Independent learning
Multi-tasking
Quick time decision making
Data management & analysis
Leadership
Motivating
